## PROJECTS

espncriinfo.com Clone. [🔗](#)

- Deployed link [🔗](#)
- This website is all about cricket scores and you can see past, live and upcoming cricket matches information.
- **Tech Stack** : HTML | CSS | JavaScript | ES6
- **Features** : Fixed Navbar | Pop-ups | Hover | Dynamic | Responsive.
- **Areas of responsibility**: It is a collaborative project. As a team lead, scheduling and conducting meetings, distribute the work, and help the team in case any the team members faced any issues. A live score page was created and collected data for the same. Made this page responsive and dynamic with a media query for all devices.

Online-Green-Nursery [🔗](#)

- [Video link](#) [🔗](#)
- This is a REST API for online nurseries. anyone can use it for their backend system or as an API for storing the data, fetching the data in the frontend, or performing crud operations.
- **Tech Stack** : Spring boot| Hibernate | Data-JPA
- **Features** : Field Validation | Authentication | Association mapping | Login/Sign.
- **Areas of responsibility**: Customers, Order, and Seeds entities are created and implemented, applied field validation and authentication by me. This was a team project.
